Striving to reduce the identified mismatch between demand and supply on the labour market, "Norway for You" is supporting local self-governments to improve knowledge, skills, and competencies of unemployed vulnerable persons in line with labour policy measures in their respective Local Employment Action Plans (LEAPs). The support should enhance employability of the vulnerable and unemployed groups, mainly those with lower levels of education, youth, older than 50 years of age, social welfare recipients, Roma and long-term unemployed, in accordance with the need of the local labour market. The projects will begin in May 2019.
